[Setup Instructions](#)

Management Tools

- **Appliance Configuration**
Reconfigure the appliance's network settings, time, SSL certificates, and passwords. **Do NOT** use native operating system tools for system configuration. Native tools are not aware of Novell appliance requirements.
- **Novell Filr Appliance Configuration**
Manage the Novell Filr Appliance. For more information, refer to the configuration tool help.
- **Ganglia Monitoring**
The Ganglia Monitoring Tool is an open-source web tool that provides scalable distributed monitoring. Basic Ganglia configuration is done in the Appliance Configuration tool. No extensive testing has been performed on this tool and there are no plans to make fixes. To Learn more, see www.ganglia.info.

IPREDICTS is a command line interface (CLI) that automates the creation and deployment of IBM i Open Source and Red Hat Package Management packages. Learn more about IPREDICTS here. Our Marketing team will be doing their annual customer appreciation tour this week. The tour will include live demonstrations of our clients current installations of our products and solutions. If you'd like to find out more about how IPREDICTS can help you to automate your package management tasks, contact your IBM Business Partner or contact us here to discuss how we can help you. Here's a quick overview of what's included in this release: Updated IPREDICTS Client New IPREDICTS Enterprise Edition licensing model Updated versions of IPREDICTS Enterprise Manager 6.0 and 7.0, which include support for IBM i 8.5 Updates for z/OS, z/VSE, iSeries, z/VM and z/Linux IPREDICTS Enterprise Edition licensing model If you're looking for a more cost-effective and flexible deployment option than the traditional on-premise licensing model, IBM i Open Source now offers the option of utilizing the IPREDICTS Enterprise Edition license. This new, per-seat approach to licensing is designed to enable organizations with very large deployments of IBM i Open Source to use the software for free without the need for any hardware or installation services. With the IPREDICTS Enterprise Edition license, your organization can utilize the following services: IPREDICTS Enterprise Manager 7.0 or later includes support for IBM i 8.5 If you'd like to know more about how you can leverage IPREDICTS Enterprise Edition, contact your IBM Business Partner or contact us here to discuss how we can help you. Be sure to check out our June 11th blog, which will provide details about a quick demo of this new feature. Our Engineering team is hard at work building a brand new service that will provide a more intuitive way to manage and deploy IBM i Open Source applications. The new service is called IPREDICTS Cloud, and will be released later this summer. IPREDICTS Cloud will allow you to deploy your IBM i Open f3e1b3768c
