Note: the download image is the latest version. Please download the latest version if the download image is not available. I found a bug in the boot animation. But the bug is fixed and the animation sequence is normal. Moreover, after the end of the animation sequence, it can not see the boot up the operating system, so I have to press the Power button (vol+ key) to shutdown. Also, Samsung Web UI can not be seen after the system boot up normally. I would like to ask whether the fixes for the boot animation and Web UI are available? I have checked the SM-J100H/DS Firmware and found some files “*NOTE-1*” “*NOTE-2*”. But I have no idea how to download the files. Could you help me with that? Thank you for your consideration. George Hi George, I have already reported this issue to our Support team. I have reproduced this problem myself. You can use the details I provided to support as an example. I will wait for the Support Team’s reply in order to know the exact fix. Samsung Remote Controller I own the Galaxy S5. and I use my Samsung remote controller to watch TV, which is not available as the default TV remote controller. Is there any other way to control the TV? Can you tell me whether there is any other way to control the Samsung TV with the Samsung Remote Controller? Hi Sanjana, You can use the information provided to support for Samsung TV remote, here. In my experience, the minimum requirement to use the Samsung TV remote is to connect it to a Samsung TV. Samsung I have downloaded the firmware update for the samsung galaxy s5. I can see the icon at the bottom, but when I click on it I get an error message: “Could not find device: BANDWIDTH-2GB, the firmware update does not start. Is the problem related to my wireless connection or should I re-install the firmware? Hugh Hi Hugh, Thank you for your feedback. If you have a different country’s name for your wireless connection, please check the compatibility list. You can update the firmware of your wireless network adapter by referring to the
