Fnordbot

Fnordbot is a simple IRC bot that aims to be extensible and user friendly. The bot is designed to be able to be used for testing your own chat-algorithms or as a replacement for a standard IRC client, as it provides a full command set. Fnordbot Features: - Nouns, Verbs, Action Sequences, Keywords, Command Categories and Sub-Categories - File Uploads and Downloads - Runs as a Windows Service - NSIS Installer for Windows - Configuration DLL and Parameter DLL - i3D Client (for visualization of bot commands and strings) - Using MessageArchive to store whole conversations - Automatic user creation - Contact list using an SQLite database - Custom WebIRC User Interface - Logging to file and to an SQLite database - Ability to parse and interpret almost any kind of data - Multiple channels - JIRC Client (for testing syntax) - Parser/Generator (for easy syntax updates) - Parser Library - Online Chat Framework - Sockets for commands, file-transfers, etc. - Uses WebIRC, a user interface for IRC that can be embedded in web pages - Supports RTAI, RTAI2, and GoIRC - Includes mIRC, irssi, and i3D client Installation Instructions: - Download and install NSIS, NSIS2 and WebIRC if needed - Download the DLLs from the repository or from GitHub - Run the installer, and then register the bot - Start the service - Run the i3D client, and visit User Manual: - To run the installer, the required DLLs should be in the same folder as the installer. - For information on how to configure the bot and i3D client, see the user manual. - To see the full list of commands, run "help" - To see the available channels, run "join #something" - To see the full list of available commands, run "help" Troubleshooting: - If the bot does not work at first try to change the port number it listens on from 8888 to something else, until it works. - If you're on Windows, check that the bot listens on port 8888, and that you have configured i3

What's New in the?

Fnordbot is a beginner friendly IRC bot, that's most probably one of the easiest to use bot in the free and open source universe. It's main function is to act as an IRC server (how to setup a server on your local machine is in the manual). The bot is made to be as simple to setup and use as possible. The bot is extensible, and all functions are build as plugins. The bot is written using only C++. The requirements for compiling the source are pretty low, only a C++ compiler is needed. With some work, you can easily turn Fnordbot into an IRC client as well. (easy it ain't!) An introduction to Fnordbot can be found on the website. Features: +support for multi line commands +support for multi command plugins +support for user-defined plugins +support for globbing and glob matching +support for a combination of IRC commands and manual instructions +support for multi command plugins/commands/autocomplete +support for a combination of IRC commands and GUI instructions +plugin for an IRC client +support for a combination of IRC commands and manual instructions +support for a combination of IRC commands and GUI instructions +support for a combination of IRC commands and GUI instructions +irc mib plugin (for static mibs) +irc mib plugin (for dynamic mibs) +irc mib plugin (for MIBs with an arbitrary number of levels) +irc mib plugin (for MIBs which specify a second MIB to inherit) +irc mib plugin (for MIBs with an arbitrarily long structure) +irc mib plugin (for MIBs which specify a third MIB to inherit) +irc mib plugin (for MIBs which have an arbitrary number of elements) +irc mib plugin (for MIBs with a generic structure and arbitrary element names) +irc mib plugin (for MIBs which have a complex structure and a variable number of elements) +irc mib plugin (for MIBs with a structure and named elements) +irc mib plugin (for MIBs with a structure and named elements) +irc mib plugin (for MIBs with a complex structure and a fixed number of elements) +irc mib plugin (for MIBs with a structure and a fixed number of elements) +irc mib plugin (for MIBs which have a structure, and a variable number of elements) +irc mib plugin (for MIBs with variable structure and a variable number of elements) +irc mib plugin (for

System Requirements:

Installed RAM must be 1GB or higher Installed VRAM must be 128MB or higher Resolution must be 720p or higher MEMORY: Intel Pentium D or higher for Windows XP and Vista Intel Core 2 Duo or higher for Windows 7 and 8 Intel Core i3, i5, or i7 (Haswell only) Intel Core 2 Quad (Haswell only) DirectX 9.0c Intel HD Graphics 3000 or better for Windows
