## AutoCAD 2022 [New]

Uses the following scripting language: AutoLISP AutoCAD Architecture AutoCAD Architecture (ACA), also known as AutoCAD X3D or X3DAutoCAD, is an Autodesk family of 3D CAD software products. The X3D is a new XML-based file format for exchanging 3D models between different CAD applications. The software supports creating and editing 3D models in various file formats including 3D Studio and SketchUp. It is compatible with all Autodesk CAD programs and has features to create mechanical assemblies, visualize 3D models, measure objects, create custom views and 3D drawings, and perform parametric and repetitive engineering tasks. The applications also can be used to create 2D images from 3D models. AutoCAD Architecture is available in two versions: AutoCAD Architecture and AutoCAD Architecture LT. AutoCAD Architecture LT is for use on workstations with 32-bit processors and a minimum of 1 GB of RAM. It is designed for non-commercial home and small business use and is sold bundled with multiple licenses of AutoCAD. AutoCAD Architecture LT lacks some features found in other Autodesk CAD products, such as parametric modeling, realistic materials, and sheet metal. There is also a special version of AutoCAD Architecture with a reduced feature set available at a reduced price. AutoCAD Architecture can be installed on Microsoft Windows, Mac OS X, and Linux. According to Tech Market Update, AutoCAD Architecture LT generated \$14.3 million in sales in 2016 and \$20.6 million in 2017. AutoCAD Architecture LT AutoCAD Architecture LT is a reduced version of AutoCAD Architecture, which was discontinued in 2015. The software supports creating and editing 3D models in various file formats including 3D Studio, SketchUp and 3DS Max. The
