Number Convertor Serial Number Full Torrent Free For Windows

Number Convertor is a very small tool that can translate numbers in multiple languages. Use it to quickly translate numbers from English to Chinese, Korean, Arabic and Japanese. When you're learning a new language or wish to translate text, it could be quite difficult to translate numbers from one language to another. Fortunately, there are some applications that could help you with just that. One of them is Number Convertor. It's a neat software solution that allows you to translate numbers into multiple languages. Sleek and clean user interface The application installs quickly and it sports a really intuitive graphical interface with multiple nice features and tools that you can check out. It has some neat customization options that you can check out. The program allows you to remove windows from display, adjust the tab display and all flat buttons or set the application to stay on top of other programs. It also comes with multiple tips and instructions that you can check out. Translate numbers easily It allows you to translate numbers from English to Chinese, Korean, Arabic and Japanese. You simply need to type in the number in English and get the translation. It allows you to remove spaces between words and toggle upper or lower case. Font size can be adjusted and you can increase or decrease the entered number. You can also change the font style and type, simply pick the one that you like the most. It allows you to add text effects, like strikeout and underline, you can view a preview of your font style. Some more tools Use tabs to view translations in multiple languages or have the application display all translations in the same window. You can copy and paste translations outside the application, but it doesn't come with the option to save translations in a document. It has a neat feature that allows you to set a number interval and the application will translate all numbers and display them in a separate window. All in all, Number Convertor is a small but useful application for translating numbers in multiple languages and copying the information to other documents on your computer.
