It is part of the family of browser tools that includes Opera, Vivaldi, and SeaMonkey, which is a fork of Mozilla Firefox. Platforms Windows, Mac OS X, Linux, and Chrome OS. Features Offline browsing, sync (extend), download protection,... It includes features like the Google Chrome browser plugin Web Push, which lets you use Chrome to control the desktop remotely (using only ChromeOS), and aims to be the most secure Android app by offering device lock down and an option to remove the device from the Google account. Browser Pro Review: "Chrome is probably the closest solution to the classic Internet Explorer. Its simplistic user interface and intuitive navigation system make browsing the web very easy and familiar. You can configure it to appear in a floating window or the system bar as the browser of choice. And don't get me started about the sync functionality between Chrome and other programs." System requirements: Minimum requirements: Windows XP/7/Vista/8/10 (32 bit or 64 bit) Recommendation: 16 GB of RAM Graphics processor: 1.2 GHz Hard drive: 20 GB available space Conclusion If you think Chrome is a simple, smart and handy software, you'll have to try out Browser Pro. It may not look like it, but there's a lot more to it than meets the eye. Thanks to the excellent user interface and generous features, you'll appreciate it for its simplicity and one-of-a-kind implementation. Share with your friends! *** The first and best SuperTux-kart game released under GPL. We love GPL! *** ST-Kart is a racing game with over 50 levels in various locations such as a desert, forest or a snowy mountain. A large variety of vehicles are available ranging from a spaceship to a bulldozer. If you have never played a SuperTuxKart game before, don't worry – you can learn the basics in ST-Kart itself. On the game you will start with a kart to collect the usedparts you need to build other vehicles. For building you have to combine two types of the same vehicle and put together a special craft. No matter, which vehicle you're using, the top speed of the game is always exactly 100. You have to drive through the designated shortcuts carefully, collect all bonuses on your way and avoid the obstacles which can be played by other karts. If you succeed, your opponents will crash and the game is won. Can you do it? Having been renewed from beta to release, the only thing you need to do is to get the ball rolling on your own. ST-Kart is free for all to play and use, with no registration or additional items to buy. The graphics are pixelated and the sound is cheesy, because we wanted to keep the price to zero. If you have other questions about the game, don't hesitate to ask
