Oct 25, 2016 I've just changed my guide for installing XCOM Long War mod (found here - how to install the long war mod on a cracked xcom 1.0.1) by adding If you want to play XCOM Long War mod on your game, first of all, you have to download the files from here. If you don't want to do that, you can decompress and extract the files from archive-LW-MOD_v5.0.1.zip to the "Steam\steamapps\common\XCOM 2\XCom2-WarOfTheChosen\XComGame\Mods" directory and replace the old mod by LW v5.0.1.exe Here's what you have to do: 1. 1. Open Steam, go to Games > XCOM 2 and press "Import Game", then choose and select "Give me your fucking game!". Accept the terms. You will get a folder containing: - XCOM 2.pk3 - XCOM 2.exe - XCOM 2.xml (and xcom2ui.xml) 2. Move your files in the Steam\steamapps\common\XCOM 2\XCom2-WarOfTheChosen\XComGame\Mods\ folder to the XCOM 2.pk3 and XCOM 2.exe folder (this doesn't matter, but you don't want to put the files you downloaded in the longwar folder). 3. After you unzip the archive, and move the files to the correct folder (you will have LW.exe at the end of the process), you must compile it. That's easy, just launch LW.exe, the game will be done loading. 4. Run the mod when 82138339de
