Structure Edit The Structurize Edit extension is a software development kit (SDK) for AutoCAD that provides access to and manipulation of the Structurize command line tool.

Model Derivatives Model Derivatives is a CAD (computer-aided design) software extension that displays two-dimensional vector drawings in 3D. It works on AutoCAD's.DWG files. Model Derivatives is the source for an upcoming feature in AutoCAD called "AutoMI" which will generate parametric models and surfaces.

Architecture tools AutoCAD Architecture is a software development kit (SDK) for AutoCAD that includes the various basic building blocks for 3D modeling with AutoCAD, such as 3D primitives, site modeling, structure design, and 2D drafting/layout. It supports the creation of both 3D models and 2D drafting/layout plans. Architecture creates 3D models from 2D layouts as well as 2D layouts from 3D models. Architecture allows the creation of architecture from a plan or a layout, and supports many different kinds of structures, including warehouse, office, retail, restaurant, educational, and public buildings. The plan or layout can be "personalized" for any user by choosing the style, project type, and theme. The result can be rendered as a series of two-dimensional images. AutoCAD Architecture is based on the same technology as AutoCAD MEP, Autodesk's Building Information Modeling (BIM) software product, and is considered a sister product. AutoCAD Electrical is an extension for AutoCAD that enables electrical engineers and electrical contractors to model and design electrical systems, and related devices. Its integration with AutoCAD provides a complete 2D/3D design environment in one software suite. The product combines schematic design, electrical design, electromechanical design, and structural design into one application and a unified design environment. AutoCAD Electrical can import many electrical and mechanical data formats, including EIA-310-2002, IEC 61300, and ANSI/ASCE B14.2. It can export to many other data formats including IEEE Standard 1076. In addition, the product can export to other software products such as Microsoft Visio, Microsoft Project, Microsoft Excel and others.
