## MC Get MAC

This application will help you to determine the ethernet address of your NIC and to save it. After you save the result the application will also be able to add a comment and also a note. Prerequisites: You will need an ethernet NIC installed on your computer. The ethernet address of your NIC must be in use and have not been used for a long time. You can not save the ethernet address if it is used. You can not save the ethernet address if you don't have the correct IP address. Instructions: 1. Launch MC Get MAC application. 2. Choose "Save" from the "File" menu and enter the name of the file. 3. Choose a note from the "Menu" menu and enter a comment. 4. Click on "OK". 5. Click on "Next" to continue. 6. Read the text on the screen and click on "OK". 7. Click on "Next" to continue. 8. Read the text on the screen and click on "OK". 9. Click on "Finish". 10. Click on "Save" to save the result. 11. The result will be saved under the same folder and its name. 12. Click on "OK" to return to the previous screen. 13. Close the application. 14. The result will be displayed. Installation instructions: You need to save the application in your hard drive and run it from the "Start Menu". Donation: If you found MC Get MAC useful, please consider making a donation. Donation via PayPal: Donation via BTC: 1HCSxYIKbM4rxu4DLd6CDrvFVvkZTvj9pC Your comments are welcome. This invention relates to the field of air handling equipment for data centers. Data centers typically are large, specially constructed structures used to house computers and associated electronics equipment. The data centers are typically constructed as Class A or Class B, e.g., in accordance with the requirements of the ITU-T (International Telecommunications Union-Telecommunication Standardization Sector) G.

## What's New In MC Get MAC?

In recent years, with the development of wireless communication technology and network infrastructure, Ethernet communication has been adopted more widely. The implementation of the Ethernet technology requires that the MAC address of the NIC (network interface card) of a computer, the IP address of the network interface card, the MAC address of the cable of the network card in the computer must be unique. Any software that can only obtain the MAC address of the NIC (network interface card) can be a fatal blow to the operation of the computer. Therefore, it is very important for the computer user to know the MAC address of the NIC. However, MAC address is a unique number, which is stored in a memory chip on the NIC. Every NIC is unique, and its MAC address does not change over time, so MAC address is not easy to obtain. Because of the importance of the MAC address, users need to search for the MAC address of the NIC of their computer. This process is usually very cumbersome. With the help of this application, users can automatically obtain the MAC address of the NIC. Note: 1. The utility cannot perform correctly when there is no NIC. 2. Before the utility can run, the user must select the type of NIC. Version history V1.0: Moved some parts of the function, the basic interface. V2.0: 1. New interface: interface is simple and beautiful 2. New interface: Select the method to obtain the MAC address 3. Improved the MAC address: now the utility can obtain all the MAC address of the NIC 4. Improved the MAC address: now the utility can obtain the

---

MAC address of the NIC you select 5. Changed the function of the utility. FAQ What is a NIC? 1. Network Interface Card: a thin card with a connector that connects a computer to a network. 2. Network Interface Card: a thin card with a connector that connects a computer to a network. 3. Network Interface Card: a thin card with a connector that connects a computer to a network. How to run the MC Get MAC utility? 1. After the connection to the Internet, launch the application. 2. Enter your NIC model: network interface card (NIC) 3. Select the Get MAC button How to use the MC Get MAC utility? 1. After the connection to the Internet, launch the application. 2. Enter your NIC model: network interface card (NIC) 3. Select the Get MAC button 4. Then the utility will find the MAC address of the NIC If it does not run well, please remove the dust from the memory and relaunch the utility. ## Note The MC Get MAC utility is a simple tool, the purpose is to help users
