DGN (Design Graphical Notation) format is one of the native formats used to store a CAD database. History AutoCAD was originally developed at Autodesk in 1980 as AutoCAD Primitive. The application was first released in 1980. From 1980 to 1990, it was a general purpose drafting program, but lacked many features of specialized applications such as AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D and AutoCAD Mechanical. It did not support parametric drawing and was not capable of multi-user design. Although the graphical user interface (GUI) and drawing features of AutoCAD were not sophisticated, the development of the software itself was a major step in CAD, and the application was, and remains, a benchmark for the CAD industry. In 1987, AutoCAD 2.0 was introduced as a completely new product. Although still based on the same programming environment as AutoCAD Primitive, it became much easier to use, and had new features such as dimensioned drawing, profiles and cross-sections. Later the same year, AutoCAD 3.0 was introduced, which included specialized features such as parametric drafting, 2D and 3D mechanical parts, drafting templates, etc. This was followed by the release of AutoCAD 3D in 1989. In 1990, AutoCAD 4.0 was introduced, followed by AutoCAD 4.5 in 1992. In 1995, AutoCAD 4D was introduced, followed by AutoCAD 2000 in 1998, which introduced a completely new design environment and was re-branded as AutoCAD 2000. In 1999, a major version of AutoCAD, AutoCAD X4, was introduced, which was completely redesigned. The interface was completely redesigned and new features such as 3D printing, CAM and Design Web were added. In 2000, AutoCAD X5, the first release to support both Windows and Mac was released. Starting with AutoCAD X6 (2004), the X-series was discontinued in favor of the A-series, which introduced a new user interface and new programming languages, Visual LISP and AutoLISP. AutoCAD 2010 (2006) was the first release to use the new A-series programming language and was the first release to include all major architectural and civil 3D tools as separate products. AutoCAD 2010 was also the first release to support 64-bit architecture on Windows XP, Windows Vista and Windows 7 a1d647c40b

Billionaires' Wealth Grew by \$45 Billion In Q1 – Bloomberg The wealth of the 1,000 richest Americans rose by at least \$45 billion in the first quarter of 2013, according to a Bloomberg News survey of leading banks and securities firms, despite warnings from economists and the Federal Reserve that the gains may be smaller this year. The survey, conducted by the Bloomberg Billionaires Index, is based on Bloomberg News' estimate of the net worth of the world's richest people, including cash, investments and business holdings. Total net worth of the richest 1,000 people in the United States increased \$27.1 billion from the fourth quarter of 2012 to \$1.43 trillion. Bloomberg News data show that stocks were up 2.5 percent and bonds were up 1.6 percent as of March 31, the latest data available. Billionaires' income and estates grew by at least \$2.5 billion each, the survey shows, with the top five fortunes increasing by as much as \$35 billion. Net worth of the richest 1,000 people increased \$28.7 billion, or 5.8 percent. The total increase from the last survey in 2011 was 6.8 percent. "I would agree with what the Fed has been saying for some time: that the returns on capital will be lower for 2013 than they were in 2012," said David S. Blanchflower, a professor at Dartmouth College and co-author of the study. Still, the Bloomberg Billionaires Index of the rich has recovered after hitting a post-financial-crisis low of \$1.9 billion in April 2012. The average net worth of the world's billionaires in the first quarter of 2013 was \$3.4 billion, up from \$3.3 billion a year earlier. At a May 31 retreat at the Federal Reserve Bank of Chicago, Fed officials gave little guidance about when the central bank might scale back bond purchases, raising questions about whether an unprecedented 1.75 trillion-dollar reduction in the central bank's bond holdings this year could be a one-off or lead to less money in the economy. There are 1,000 people in the Bloomberg Billionaires Index, including 388 Americans and 612 non-U.S. residents. Only the net worth of those in the United States is included in the survey.
