Searched Lenovo laptops - LCD resolution - 1366x768 - 8GB memory..  
Try one of the other model numbers below. "2200: Machine Type and  
Serial Number are invalid" Fresh installing the latest BIOS -  
2.20-021301-R0X. This process just for typing a BIOS update. I will not  
open the machine.

Abstract This paper considers the problem of lemma  
selection for the lambda calculus. We show that the most general  
lemmas available, with the possible exception of lambda elimination,  
do not suffice to encode theorem proving procedures for full calculi, but  
also must capture the notion of lambda conversion and the Curry-  
Howard isomorphism. We find that the two best candidate lemmas,  
syntactic decomposition and lambda conversion, suffice to encode  
theorem proving procedures for Lambda-calculi in which lambda  
conversion is part of the language. We show that these lemmas can be  
combined with the corresponding lambda conversion rules to form the  
equivalent of the calculus C.C 1, the intended target of the calculus C.C

---

1. This strategy is exemplified by the development of procedures for proof search, where the role of the lemmas is played by computational lemmas. Abstract The main result of this paper is to show that the most general lemmas available, with the possible exception of lambda elimination, do not suffice to encode theorem proving procedures for full calculi, but also must capture the notion of lambda conversion and the Curry-Howard isomorphism. We find that the two best candidate lemmas, syntactic decomposition and lambda conversion, suffice to encode theorem proving procedures for Lambda-calculi in which lambda conversion is part of the language. We show that these lemmas can be combined with the corresponding lambda conversion rules to form the equivalent of the calculus C.C 1, the intended target of the calculus C.C 1. This strategy is exemplified by the development of procedures for proof search, where the role of the lemmas is played by computational lemmas.

Q: WebView in Notification and Schemes is not working I'm trying to make an app with 2 activities. Activity 1:

```
@Override public void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
```
