It can even be an entertaining pastime." - Kevin Ashton - INGENIA® and Dad of INGENIA® Interface I don't think that this tool is totally useless. But you need to understand that we have in this world "pirates" and "crackers" in large numbers. and when your PC is hacked, you will have a very bad time. in this situation, this tool can be very useful!Guinness World Records holder Dwayne 'The Rock' Johnson prides himself on being a part of some of the biggest movies of the last decade. However, the first film that really brought him attention was 'The Mummy'. Starring alongside previous 'Fast and Furious' co-star Brendan Fraser, the film is now considered a classic and one of the first entries in the franchise. Johnson has released two 'Fast and Furious' films since 2009 and the third is due for release later this year. As well as 'The Fate of the Furious', however, Johnson has also been a part of the 'Battleship' film, 'San Andreas' and the upcoming sequel to 'The Mummy'. While 'The Mummy' is only regarded as a success, it remains one of the most profitable films of Johnson's career. The film not only made over \$315 million at the box office worldwide, it also won Johnson a Golden Globe for Best Actor. With one of the biggest box office takings of 2010, Johnson is now hoping that he can repeat the success of the first film. Even though 'The Mummy' is considered a box office success, it suffered a decline in the second half of its run. Its third weekend was a big letdown for the film and the production team has now explained why it was released so close to Halloween. Because of the 'Fast and Furious' movies, Johnson has become one of the biggest action stars in the world. Although he has won praise for his performances in other, more character-led films, Johnson is never one to turn down the opportunity to act.
